FOR IMMEDIATE RELEASE

Accsense Remote Sensor System featured at HVAC trade show- AHR Expo, Dallas, Jan. 29-3, 2007

SANTA BARBARA, Calif., Dec. 1, 2006 – Visit Accsense at AHR EXPO, booth 42086 and see how remote physical sensors can rapidly and wirelessly process heating and cooling data - effectively meet ASHRAE standards, track air-flow data, keep accurate temperatures, monitor humidity and more. Accsense's out-of-the-box solution is up and running in five minutes, allowing users to start recording data and receiving information immediately.

A complete Accsense wireless system automatically forms a secure, self-healing wireless mesh network with a range as long as 4000 ft. Accsense sensor Pods are compatible with a range of standard external plug-in sensors and probes, including thermocouples, resistance-temperature detectors, and thermistors.
